FOREWORD

Founded in 1951 by 16 States as the Provisional Intergovernmental Committee for the Movement of Migrants from Europe, by 2025 IOM had grown into the United Nations system's leading migration agency, with a global portfolio of USD 2.95 billion and 15,814 staff across its 175 Member States, 8 observer States and other areas in which IOM has activities.

The context in which IOM operated in 2025 was exceptionally challenging. Conflicts deepened. Climate shocks accelerated. Shifting political landscapes reshaped societies across every region. Systems built over decades to deliver on shared goals – humanitarian, development, migration governance – faced profound and sometimes painful disruption.

Yet people continued to move. By mid-2024, **304 million people** lived outside their countries of origin for work, study or family reasons. By the end of 2025, **82.2 million people** were internally displaced, and throughout the year nearly 7,900 migrants died and a further 1,500 went missing on migration routes worldwide – a stark reminder of the risks faced by people on the move. In response to these realities, IOM delivered on all three of its strategic objectives: saving lives and protecting people on the move, driving solutions to displacement and facilitating pathways to regular migration.

In the most difficult settings, from Afghanistan and Haiti to the Sahel and the Sudan, we innovated and provided life-saving assistance at scale, rapidly, reliably and with impact. When faced with protracted displacement or climate shocks, we expanded our work on lasting solutions for internally displaced people in close partnership with other United Nations agencies. To support Member States in harnessing migration as an opportunity through pathways whilst addressing drivers of irregular migration, we worked to strengthen border governance, skills-based labour mobility and diaspora engagement, whilst upholding migrants' rights and protection, including in cases of return and reintegration.

This was also a year of painful internal adjustment as the international aid system shifted and donor priorities changed. A sharp decline in available resources necessitated difficult decisions: separating staff, scaling back or ending projects and reducing Headquarters presence while protecting core functions. Despite the difficult organizational changes, IOM was able to maintain a strong field presence and assist 17.8 million people across 170 countries and territories, delivering emergency aid, helping displaced families find solutions, supporting safe migration and assisting communities to recover after disaster.

In June 2025, IOM launched the Resilience Campaign as a strategic appeal to Member States and partners to safeguard the Organization's core capacities amid rising global instability and shrinking flexible funding. A Resilience Fund target of USD 100 million was established, of which a minimum of USD 60 million was required to sustain and ensure continuity of essential core structure activities in 2026.

The campaign secured pledges from 20 Member States, two private sector partners and one federal state government. We also launched the Islamic Philanthropy Fund to expand access to charitable giving and signed new partnerships with international financial institutions, the private sector and faith-based organizations. Building on this momentum, the Global Appeal 2025 sets out a targeted and prioritized approach to reach 101 million people with protection, assistance and solutions.

Internal reforms remained a priority, with continued investment in institutional efficiency, oversight and accountability. We expanded digital tools to strengthen analysis and delivery while ensuring compliance with data protection. Across the Organization, we invested in data systems, artificial intelligence and digital skills to improve how we track displacement, diagnose disease, draft proposals

and manage operations to pivot from reactive response to proactive, anticipatory action. In 2025, IOM entered the third year of its budget reform, which, together with the completed Internal Governance Framework initiative, has fundamentally strengthened the Organization.

IOM's work takes place within a United Nations system that is itself undergoing profound change, where each agency must focus on what it does best. IOM advanced system-wide efficiency efforts through the UN80 Initiative and the Humanitarian Reset, including through our new co-lead role in the Shelter, Land and Site Coordination Cluster.

Throughout 2025, as we navigated global uncertainty and financial constraints, we counted on the trust, support and partnership of our Member States, partners and the communities we serve. That trust is our strongest asset and our greatest responsibility. Grounded in courage, empathy and accountability, IOM will continue to deliver principled and effective action for people on the move and the societies in which they live.

Amy E. Pope
Director General

IOM OPERATIONS AND ACTIVITIES

Saving lives and protecting people on the move

1. IOM is a front-line agency responding to global displacement crises. Partnering with governments and humanitarian partners, the Organization helps ensure that crisis-affected populations have their basic needs met and can access protection and essential services.
2. IOM prioritizes data-driven approaches and flexible programming, connecting humanitarian, development and peacebuilding efforts. The Organization emphasizes local partnerships, innovative financing and climate resilience to address the underlying causes of displacement. Inter-agency coordination and strategic foresight remain essential to balancing immediate aid with long-term solutions and upholding dignity for displaced populations even as operational pressures grow.
3. In 2025, IOM's work on the mobility dimensions of crisis reached over 17.8 million people, including internally displaced persons, refugees, migrants and host communities. Of the 1.4 million beneficiaries surveyed, 87 per cent considered that IOM's humanitarian assistance had been delivered in a safe, accessible, accountable and participatory manner.

Box 1. IOM's multisectoral crisis response in the Sudan

The war in the Sudan has triggered one of the world's largest displacement crises. Since April 2023, more than [15 million people have been forced from their homes](#). While many remain uprooted, some families have begun returning to cities like Khartoum, often to damaged homes with minimal services and little security. IOM was the first United Nations agency to resume operations in Khartoum to support returnees, internally displaced persons and affected communities as they work to rebuild their lives.

Nationwide, IOM delivers shelter, non-food item, and water, sanitation and hygiene (WASH) assistance through the common pipeline, which coordinates procurement, warehousing and logistics for more than 20 partner organizations. The Rapid Response Fund complements this effort and is a flagship mechanism for localization, enabling swift distribution of flexible grants to front-line partners, specifically local and national non-governmental organizations. This funding facilitates multisectoral humanitarian response, providing essential health care, WASH and emergency shelter in hard-to-reach and conflict-affected areas. Working closely with national and international actors, IOM ensures that support reaches those most in need.

At the same time, a network of 560 data collectors fed into the Displacement Tracking Matrix (DTM), generating critical analysis to guide targeted interventions, while newly established inter-agency hubs strengthen coordinated life-saving and recovery efforts. In 2025, IOM reached more than 1.1 million people with humanitarian, resilience and recovery assistance, including clean water, non-food items, protection services, movement assistance, multipurpose cash assistance, health care and mental health support. Despite these efforts, ongoing violence and access constraints continue to jeopardize progress, underscoring the need for more resources and sustained safe passage for humanitarian workers. For more information, see the [Sudan Crisis Regional Response: Annual Report for 2025](#).

4. Central to IOM's response globally was the DTM, IOM's primary data system on displacement and population movements, which provided timely and targeted data for humanitarian response plans. As of December 2025, the DTM was operational in 76 countries having assessed 166.3 million people, including 54.9 million internally displaced persons, 29.4 million internally displaced returnees and 9 million returnees from abroad. Humanitarian country teams drew on DTM data for 95 per cent of humanitarian needs and response plans developed in 2025 (19 out of 20). These plans informed

responses in Afghanistan, Cameroon, the Central African Republic, Chad, Colombia, the Democratic Republic of the Congo, Haiti, Mali, Mozambique, the Niger, Nigeria, Somalia, South Sudan, the Sudan, the Syrian Arab Republic, Ukraine, the Bolivarian Republic of Venezuela and Yemen.

5. IOM provided humanitarian movement assistance to 761,516 people to support their in-country movements, safe evacuation, relocation and voluntary humanitarian return, as part of IOM's crisis response programming in Afghanistan, Chad, Ethiopia, Latvia, Libya, South Sudan and Yemen, among others. This included support to 742,354 vulnerable individuals with onward transportation and access to essential services.

6. IOM's emergency health response in 2025 strengthened health systems while meeting the immediate and long-term needs of crisis-affected populations. IOM established and maintained emergency health projects across 24 countries, providing 4,152,894 health-care consultations and facilitating 47,745 referrals in crisis settings. The Organization made 28 emergency health deployments, refurbished 148 health facilities and delivered over USD 16.2 million in medical supplies to ensure delivery of life-saving care and strengthen health systems in crisis-affected areas.

7. In 2025, IOM provided mental health and psychosocial support in 99 countries, including through government-led initiatives, reaching 1.5 million individuals. Of these, over 1.1 million people were reached in crisis settings. Of those assisted, more than 280,000 individuals received individual and group counselling or participated in support groups and 80,000 received specialized clinical mental health services. A total of 24,000 participants accessed capacity-building sessions on various facets of mental health and psychosocial support.

8. IOM's shelter and settlements programmes delivered context-specific support to ensure safety and dignity and enable recovery. In 2025, these operations reached 7.3 million people in 88 countries and territories. The Organization assisted the return, relocation and local integration of internally displaced persons, and improved living conditions in displacement sites. Of those reached, 60 per cent were in Bangladesh, Somalia, South Sudan, Ukraine or the Occupied Palestinian Territory. IOM's common pipeline mechanisms reached 3.4 million people in 11 countries, with 55 per cent delivered through local partners. IOM expanded the [LOCALISE approach](#), which united emergency response, recovery and long-term development programming in area-based plans informed by local data and community input.

9. Cash and market-based assistance remains central to IOM's crisis response, ensuring flexibility and value for money. In 2025, IOM reached over 1.89 million beneficiaries (of these, 1.7 million people were in crisis settings) through cash-based interventions in 94 countries and territories. The Organization also strengthened inter-agency cash coordination through active participation in the Global Cash Advisory Group and more than 54 national cash working groups.

10. IOM's WASH programmes provided life-saving assistance that promoted public health and preserved dignity in displacement settings. In 2025, these programmes reached 5.1 million people across camps, transit centres, urban and rural areas, health-care facilities and host communities in 61 countries and territories. The largest operations by reach were in Bangladesh, Ethiopia, Haiti, Mozambique, Nigeria, Pakistan, Somalia, South Sudan, Yemen and the Occupied Palestinian Territory, which together accounted for 87 per cent of all people reached.

11. Across all its emergency operations, IOM prioritized protection. Direct protection services were provided to over 1.5 million people across 64 countries, including general protection, child protection, counter-trafficking, gender-based violence prevention and response, and housing, land and property interventions. The Organization partnered with 22 women-led organizations across 14 countries to deliver protection services and trained 36,880 individuals on protection.

12. The IOM Accountability to Affected Populations Framework reinforces the Organization's responsiveness to crisis-affected communities by promoting leadership, transparency, participation, feedback mechanisms and partner collaboration. In 2025, in collaboration with governments and humanitarian actors, 73 IOM country offices engaged over 1,387,765 affected persons, including members of community-based committees, in decision-making for the design, planning and implementation of humanitarian programming, an increase of over 140 per cent from 2024. The launch of the [IOM Institutional Guidance for Community Feedback Mechanisms \(CFM\)](#) and [CFM Connect](#), IOM's system for harmonizing community feedback across operations, enabled the Organization to systematically capture and respond to community perspectives.

Box 2. Shelter, camp management and essential supplies: scaling up life-saving assistance

In 2025, overlapping crises in Afghanistan, Haiti, the Sudan, Ukraine, the Sahel and the Occupied Palestinian Territory tested IOM's capacity to deliver life-saving support. Across these contexts, the Organization worked to provide dignified shelter, ensure access to essential services, manage displacement camps and provide critical household items such as blankets, cooking equipment, fuel and hygiene items. To meet rising needs, IOM leveraged its proven technical expertise and its standing as one of the United Nations system's largest operational agencies in shelter and settlements and site management.

In 2025, the Organization became the global co-lead alongside the International Federation of Red Cross and Red Crescent Societies of the newly established Shelter, Land and Site Coordination Cluster, bringing together the previous Global Shelter Cluster, Global Camp Coordination and Camp Management (CCCM) Cluster, and housing, land and property area of responsibility under one global coordination platform. This new role consolidates IOM's long-standing leadership in CCCM as well as shelter, settlements, and housing, land and property programming, positioning the Organization at the forefront of humanitarian coordination and standards-setting in these sectors. IOM also continued to serve as co-lead of the Climate Change Working Group of the Global WASH Cluster, advancing efforts to ensure that shelter, humanitarian settlement planning, disaster risk reduction and WASH interventions are increasingly climate-resilient and risk informed. Together, these leadership roles reinforce IOM's central role in shaping how the humanitarian system coordinates, integrates and strengthens delivery across these interconnected areas.

13. In displacement settings specifically, IOM's CCCM work engaged local and national stakeholders in preparing for displacement, improving living conditions and protection for internally displaced persons. In 2025, CCCM operations reached over 3.2 million people in 29 countries, with self-settled and informal settlements accounting for 49.6 per cent of all sites. IOM also trained 4,655 people in CCCM, with 97 per cent of participants coming from affected communities, local and national partners, and government institutions – underscoring IOM's commitment to localization. To strengthen system-wide consistency, IOM supported the roll-out of the [Zite manager platform](#), a digital tool for site monitoring and referrals, in 12 countries. Eight of those countries use its community referral mechanism to standardize feedback flows, with the platform receiving 220,000 feedback entries by the end of 2025.

14. In 2025, IOM and the Office of the United Nations High Commissioner for Refugees (UNHCR), together with other partners and working with the governments concerned, continued to advance a routes-based approach, ensuring that needs and solutions for migrants and refugees along the main migration routes were identified comprehensively and across borders rather than in a fragmented manner. The United Nations Network on Migration contributed to this as an inclusive platform bringing together all key actors working on migration issues at global and country level. IOM strengthened national prevention, preparedness and response capacities to further reduce and mitigate the threats and vulnerabilities faced by crisis-affected populations. In addition, IOM trained 133 government

officials from over 50 countries on humanitarian border management, contingency planning and protection-sensitive migration management. The Organization also supported policies aligned with humanitarian border management including a Guatemalan protocol for the care of persons in mixed migration flows.

15. IOM's global pre-positioning mechanisms for quality and cost-effective supplies led to the successful delivery of 20,230 m³ of core relief items from global stocks to 21 IOM offices in 2025. The pre-positioning of stocks continued to ensure the timely delivery of emergency assistance to crisis-affected populations during the year.

16. Beyond its appointment as the co-lead of the global Shelter, Land and Site Coordination Cluster, the Organization also maintained its leadership in humanitarian coordination, including the Inter-Agency Standing Committee clusters, sectors and other ad hoc coordination mechanisms in 51 countries. Approximately 2,523 humanitarian partners, of which 56 per cent were local or national organizations, participated in IOM-led or co-led mechanisms. IOM also [co-leads the data, artificial intelligence and innovation workstream of the Humanitarian Reset](#), jointly with the Steering Committee for Humanitarian Response.

17. Through five key inter-agency partnerships (covering prevention of sexual exploitation and abuse; shelter capacity-building in Francophone countries; area-based site management; settlement planning; and the Geneva Technical Hub; and housing, land and property technical leadership), IOM continued to strengthen standards, expand training and improve coordinated, principled humanitarian action in the sectors of shelter, CCCM, and housing, land and property.

Driving solutions to displacement

18. IOM promotes sustainable solutions to displacement in contexts of climate change, disaster, conflict, violence and fragility. Through resilience-building and self-reliance initiatives, the Organization helps displaced people and host communities recover, access essential rights and services, and rebuild their livelihoods with dignity. As the inaugural chair of the Solutions Champions Group, in 2025, IOM worked closely with governments and the United Nations system to turn prevention and solutions commitments into practice under the Secretary-General's Action Agenda on Internal Displacement.

19. IOM's approach focused on preventing new displacement, reducing its duration and supporting government-led solutions anchored in development systems. Through the Global Solutions Hub on Internal Displacement, with the United Nations Development Programme (UNDP) and UNHCR as key partners, the Organization contributed to government-led strategies in 16 countries and supported over 16.8 million people to access solutions pathways.

Box 3. IOM's contributions to durable solutions and community stabilization

IOM helps governments to promote solutions to internal displacement, providing technical support to national authorities under the overall leadership of United Nations Resident and Humanitarian Coordinators, and ensuring displaced communities have a voice in decisions that affect them.

Conflict prevention remained central to IOM efforts to prevent displacement and promote solutions, with 23 projects in this area implemented in more than 15 countries. For example, in Iraq, IOM contributed to a national strategy for the prevention of violent extremism through research, policy engagement and piloting local action plans, with a particular focus on including women in these efforts. Additionally, IOM's community stabilization programmes continued to address drivers of displacement in fragile communities, with 95 programmes implemented across 40 countries. IOM also supported more than 100,000 individuals to access livelihoods, including

through its flagship job creation mechanism, the Enterprise Development Fund, and engaged in more than 780 different infrastructure projects across a range of sectors.

Building upon its well-established partnership with the United Nations Peacebuilding Fund, IOM implemented 35 projects in 20 countries that linked peacebuilding with solutions for displacement. The Organization also supported 992 policy processes on transitional justice, recovery and development. Of those surveyed, 98 per cent of migrants, displaced persons and community members expressed satisfaction with these policy processes. These efforts helped Member States give displaced communities a path forward.

20. To support long-term stability, IOM facilitated 32 projects addressing violence, conflict and displacement through disarmament, demobilization and reintegration work, and related tools and activities to prevent violent extremism. IOM and the United Nations Department of Peace Operations co-hosted the [2025 Disarmament, Demobilization and Reintegration Symposium](#) at the United Nations Secretariat in New York, gathering United Nations agencies, Member States and partners to address disarmament, demobilization and reintegration challenges and develop recommendations for future programming in this area.

21. IOM's peace and recovery programming in 73 countries and territories directly assisted people in their attempts to find solutions to displacement, strengthen resilience and ultimately foster sustainable peace and development. Eighteen peacebuilding projects to prevent displacement received support from IOM. For instance, in north-west Nigeria, IOM strengthened local and state peace structures in Katsina and Kaduna through inclusive dialogue, psychosocial support and livelihoods assistance. In Haiti, IOM strengthened citizen trust by improving access to basic social services, enhancing security in violence-affected areas and reinforcing local governance. In Colombia, IOM partnered with the Ministry of the Interior to advance the national policy for victims' reparations and the peace agreement. Across these and other contexts, IOM supported seven government-led reparations and transitional justice efforts.

22. IOM strengthened climate resilience in 2025 by assisting 995,722 people exposed to disaster displacement across 34 countries, leading the development of 26 additional contingency plans that integrated mobility dimensions into disaster risk management and supporting the development of 155 government-led contingency plans. Additionally, IOM's recovery support reached 730,059 people, reinforcing livelihood resilience (129,653 persons reached with livelihoods support) in 1,219 climate-affected communities, with 311,379 surveyed beneficiaries reporting improved resilience and capacity to prepare for climate and disaster risks.

23. IOM attended the 2025 United Nations Climate Change Conference, and advanced tools and financing approaches, including the loss and damage costing tool, the Climate Mobility Innovation Lab's Climate Catalytic Fund, and a United Nations Framework Convention on Climate Change (UNFCCC) technical guide on accessing finance to address displacement in the context of climate change.

24. IOM's emergency health operations assisted displaced and mobile communities to access essential health services, disease prevention and recovery support. In these settings, IOM trained 12,722 health workers and reached 11,663,751 people in crisis and transition settings, including in Afghanistan, Bangladesh, the Democratic Republic of the Congo, Ethiopia, Guinea, Nigeria, South Sudan, the Sudan and Yemen. In Libya, IOM conducted 182,038 health consultations, facilitated 1,627 referrals and donated over USD 550,000 in medical commodities to the Ministry of Health

25. Of the 80,408 vulnerable refugees who underwent IOM migration health assessments, 9,438 were identified as having significant health conditions, representing 11.7 per cent of the total refugee

caseload assessed. These refugees received pre-departure treatment and coordinated travel and resettlement arrangements, supported by over 685 medical escort services globally. Immediate medical follow-up on arrival, where required, helped ensure continuity of care.

Box 4. Data-driven solutions for displacement response and recovery

The IOM [Displacement Tracking Matrix](#) (DTM) is a global data system that gathers and disseminates data on displaced and mobile populations. This information helps governments, the humanitarian sector and other stakeholders direct appropriate resources where they are most needed.

Examples from 2025 illustrate the range of the DTM's data capacity and use. In [Mozambique](#), IOM conducted displacement risk assessments to highlight the locations most likely to be affected by sudden-onset disasters. The Durable Solutions Progress Survey in [Somalia](#), led by the federal Government, provides key information on internally displaced persons and host community households, mapping progress towards durable solutions. In [Ukraine](#), DTM data shaped reintegration planning for returnees from abroad. In Jamaica, rapid satellite and aerial mapping provided an initial overview of residential building damage caused by Hurricane Melissa. Assessments in Haiti and the Sudan tracked evolving displacement dynamics, capturing shifts in displacement origins and emerging return movements that informed adaptive response. All initiatives followed strict [IOM data protection standards](#) and involved affected communities in the process.

26. In 2025, IOM assisted the safe and dignified movement of 68,532 people from 134 countries of departure to 25 countries of destination for resettlement and humanitarian admission, relocation within Europe, family reunification and other complementary pathways. IOM also provided pre-departure or cultural orientation support to 51,956 resettling refugees at over 100 training sites. In the Republic of Korea, IOM and UNHCR engaged stakeholders to strengthen refugee resettlement services and share best practices, including from the Canadian orientation programme for refugees.

27. In partnership with 29 States, significant movement assistance operations were conducted from (in descending order by size of the caseload) Pakistan, Ethiopia, Uganda, Egypt and Türkiye. The top resettlement countries, in descending order, were Canada, the United States of America, the United Kingdom, France and New Zealand, while the main countries of origin, in descending order, were Afghanistan, Eritrea, the Syrian Arab Republic, the Democratic Republic of the Congo and Somalia.

28. Complementary pathways provide safe and regular migration options beyond traditional resettlement commitments and expand the solutions available for refugees and people in need of international protection. In 2025, IOM supported access to labour migration pathways for people in need of international protection in 18 countries. In addition, IOM also launched a guide and training package for staff on complementary labour pathways, training 31 country offices to support governments and partners in establishing and expanding these pathways.

29. IOM also facilitated the integration of migrants and refugees through initiatives involving migrants and host communities. For instance, in [Colombia](#), women from migrant and host communities trained through IOM's CoNexo project led joint health and social activities, building mutual trust and fostering inclusive, resilient neighbourhoods.

Facilitating pathways for regular migration

30. IOM supported governments across broad dimensions of migration governance, ranging from border governance and legal identity to labour mobility and skills partnerships, as well as migrant protection. Working in line with national, regional and international policy, legislative and regulatory frameworks, IOM supported over 147 governments to establish and strengthen safe and orderly migration options, promoting effective migration governance and the protection of migrants' rights.

31. Robust policy, legislative and regulatory frameworks underpin migration governance, enabling governments to manage migration in a coherent and comprehensive manner. IOM supported the development of 177 migration-related policies and laws, including 26 labour migration policies and 19 counter-trafficking policies. The Organization also supported the mainstreaming of migration into 107 sectoral policies, reinforcing migration's role within broader development strategies. As an example, in the Lao People's Democratic Republic, IOM and United Nations partners supported the Government's tenth National Socioeconomic Development Plan, helping to ensure that migration is recognized as a key development priority.

32. Governments made progress in addressing the root causes of migrant vulnerabilities, with 96 strategies and practices now in place. These target underlying risk factors such as poverty, discrimination and the lack of legal protections, which have historically left migrants vulnerable to violence, exploitation and abuse. In 2025, IOM [research](#) demonstrated that climate-related hazards, environmental degradation and disasters increase exposure to trafficking in persons by undermining livelihoods and provoking displacement and unsafe migration.

33. IOM supported the implementation of 113 development strategies addressing migrant inequalities across 48 country offices, focusing on initiatives towards equal access and sustainable development. For instance, IOM partnered with the Robert Bosch Stiftung to launch the Amplifying Migrant Voices initiative in Kenya and Germany. This initiative uses participatory research and dialogue to bring migrant perspectives into labour mobility policies and practice.

34. In 2025, IOM delivered 20 courses on international migration law to over 419 participants, including government officials (diplomatic authorities and permanent missions), civil society and other stakeholders. This work included reviews of over 16 pieces of national and regional legislation on migration processes to support alignment with international standards.

35. IOM strengthened inter-State cooperation on labour and skills mobility by supporting the signature or revision of 20 inter-State or bilateral cooperation agreements and 12 regional and multi-country cooperation agreements on labour or skills mobility partnerships. These efforts contributed to more transparent, rights-based and demand-driven mobility systems that support inclusive economic growth while protecting migrant workers. In the Middle East and North Africa region, IOM engaged over 120 Member States and partners through platforms such as the Abu Dhabi Dialogue Senior Officials Meeting, advancing policy dialogue on skills-based labour mobility, green skills and climate-responsive pathways as viable regular migration solutions.

36. IOM supported 42 agreements on skills mobility partnerships with private sector actors, education institutions and employment stakeholders, through which 624,801 migrants accessed regular migration pathways for labour or study and over 936,000 students and migrant workers received information on employment opportunities abroad. Concrete programme results in 2025 included the operationalization of the European Union Talent Partnerships through the THAMM Plus programme between Tunisia and Italy, and Morocco and Italy. IOM also launched the [EAGLE project](#), linking Austria and Egypt, demonstrating how skills-based pathways can effectively address labour shortages through regular migration. Through a Canada-funded [partnership with Talent Beyond](#)

[Boundaries](#), IOM expanded labour mobility pathways from Latin America. IOM also collaborated with 2,127 private sector actors to expand regular pathways.

37. Collaborating closely with Member States, IOM's visa and admissions programming helped migrants access safe and regular pathways to Canada (in partnership with VFS Global), Germany and the Republic of Korea. Across 50 global locations, over 400,000 migrants – including family members of refugees, migrant workers and students – received guidance and support for their visa applications in 2025. IOM also verified documents submitted for visa and immigration applications at the request of Member States, confirming the authenticity of key records such as civil, employment and academic documents. Over 10,000 documents were verified across a range of locations at the request of partner governments, including the governments of Germany, Italy, Luxembourg, New Zealand, Norway and Switzerland.

38. In 2025, IOM expanded digital border and migration governance through the Migration Information and Data Analysis System (MIDAS) suite of solutions and the [Data Exchange Solution for Counter-smuggling \(DESC\)](#), supporting Member States and strengthening secure, data-driven border and migration management processes. MIDAS is now present in 30 countries, with the border management module deployed across 172 border crossing points with key operational restorations and expansions across Africa, Latin America and the Pacific. The successful launch of the e-visa module in Yemen accelerated national digital transformation agendas.

39. DESC broadened its relevance through outreach to more than 50 countries, growing to 33 active members and laying the groundwork for new regional expert networks in Europe, Africa and Latin America, modelled on the Asia-Pacific platform. Enhanced collaboration with the United Nations Office on Drugs and Crime, the European Border and Coast Guard Agency (Frontex) and the International Criminal Police Organization (INTERPOL) positioned IOM as a central actor in international efforts to counter migrant smuggling, document fraud and transnational organized crime.

40. In 2025, IOM trained over 500 government officials (of whom approximately 33% were women) from 36 Member States on legal identity frameworks, civil registration and identity management, digital identity, biometrics, fraud detection and nationality and identity determination. Implementing 97 initiatives to facilitate consular assistance, the Organization also ran regional masterclasses, workshops and country-specific training courses for around 150 consular authorities to verify identities, issue travel documents, including emergency travel documents, and work more effectively with host-country counterparts in consular services to support nationals abroad, including in return contexts.

41. IOM supported Member States in preventing and countering trafficking in persons, smuggling of migrants and related transnational organized crimes in line with the United Nations Convention against Transnational Organized Crime and its Protocols. In 2025, following targeted training and technical support, 1,528 government officials reported having applied the knowledge and skills acquired to strengthen counter-trafficking and counter-smuggling measures.

42. Under the [Cooperation on Migration and Partnerships to Achieve Sustainable Solutions \(COMPASS\) initiative](#), funded by the Kingdom of the Netherlands, IOM expanded its reach across priority migration contexts. Over 4,800 protection actors and government officials were trained to strengthen migration management capacities and 34 community-based initiatives supported migrants, aspiring migrants and returnees.

43. Through the [Global Assistance Fund](#), in 2025, IOM assisted 1,926 migrants (871 men, 297 women and 758 children) of 58 nationalities. The Emergency Victim Assistance Fund provided

short-term assistance to 579 newly identified victims of trafficking (274 men, 289 women, 1 boy and 15 girls). IOM also supported the establishment of 165 government-led initiatives to protect migrants in situations of vulnerability, including children and victims of trafficking. In West and Central Africa, IOM trained the national authorities of 13 States to strengthen case management and referral pathways for the protection of migrants in situations of vulnerability.

44. In 2025, IOM's [Counter-Trafficking Data Collaborative](#) launched the world's largest publicly available data set on human trafficking in collaboration with Microsoft Research. The data set enabled researchers and policymakers to analyse anonymized data from over 220,000 victims across 197 countries, accelerating evidence-based action while safeguarding survivor privacy. IOM engaged with 19 Member States on counter-trafficking data capacity-building and trained 20 of its country and regional offices across the Middle East and North Africa, Europe, and West, East and Central Africa to support stakeholders to improve their trafficking in persons data.

45. In 2025, IOM's Missing Migrants Project, which aligns with [Objective 8 of the Global Compact for Safe, Orderly and Regular Migration](#), documented nearly [7,900 preventable deaths and 1,500 people potentially missing and presumed dead](#), underscoring the urgent need for coordinated action.

46. IOM promoted the health of migrants and their communities, delivering 4,400,754 primary health-care consultations, conducting 634,567 health promotion sessions and deploying 1,301 mobile medical teams to expand access. IOM further strengthened health systems by training 15,579 health workers, supporting 1,224 health care facilities and 244 laboratories, and assisting governments in integrating migration health into national policies and programmes.

Box 5. Artificial intelligence diagnostics expand migration health capacity

Rising mobility barriers and public health threats continue to drive the need for scalable health solutions. In 2025, IOM partnered with the Novo Nordisk Foundation to [introduce artificial intelligence-enabled digital chest X-ray screening](#) for tuberculosis and selected non-communicable diseases in health facilities across Ethiopia, Kenya and Uganda. This collaboration, implemented with health-care technology partner Qure.ai, automates image analysis, helping address radiologist shortages while enhancing diagnostic efficiency and accuracy, and reducing costs. By the end of 2025, this pilot programme had processed 53,000 chest X-rays, with results validated by IOM radiologists. Integrating artificial intelligence tools into national systems and local health facilities aims to strengthen long-term diagnostic capacity to ensure faster, more reliable care for people on the move.

47. In line with the International Health Regulations (2005) and the [IOM Health, Border and Mobility Management Framework](#), IOM supported outbreak and other public health emergency responses at 255 points of entry in 40 countries, conducted 159 population mobility mapping exercises to inform preparedness and response, and responded to disease outbreaks in 40 countries globally, including cholera, measles, mpox, Sudan virus disease and Ebola virus disease. IOM continued to provide technical support and coordination for outbreak preparedness and response at borders including by co-chairing a continental point of entry technical working group with the Africa Centres for Disease Control and Prevention.

48. In 2025, IOM and its partners performed migration health assessments for over 581,000 migrants (14% of whom were refugees) in 93 countries, improving public health and health security along migration routes. During these assessments, IOM provided treatment and vaccinations for a range of diseases. Across all IOM health programming, 1,922,009 people received vaccinations for diseases including measles, polio and hepatitis. For more information, see the IOM Migration Health 2025 Impact Overview.

Box 6. Ensuring dignity in return, readmission and reintegration

IOM helps migrants return home safely and rebuild their lives. In 2025, voluntary return and reintegration programmes benefited over 81,785 migrants worldwide – the highest number since 2016. Reintegration services reached 81,252 returnees in 138 countries, with 92 per cent out of the 516 interviewed returnees expressing satisfaction with the services. These efforts included support delivered through European Union-funded migrant protection, return and reintegration programmes, which in 2025 facilitated return and reintegration assistance for over 56,000 migrants across North Africa and sub-Saharan Africa.

Governments also strengthened their return and reintegration systems with IOM support. Across 139 government-led initiatives, IOM promoted voluntary, safe and dignified return. Over 800 government institutions enhanced capacities for safe and orderly return or sustainable reintegration. Forty-three return management and reintegration policies or legal frameworks were developed or improved; and 42 governments strengthened their capacities for rights-based returns and readmission, contributing to safeguarding migrants' rights in a context of mounting political pressure for faster and more efficient returns. This support spanned policy, legal, operational and technical dimensions and included targeted training and facilitation of inter-State cooperation. Across 17 countries, 212 government officials received training and over 300 officials received specialized training on digital readmission case management systems, further enhancing administrative efficiency and case processing capacities.

A key focus was legal identity, helping returnees to obtain documents to access services and rebuild their lives. In June, the United Nations Network on Migration released its Guidance Note on the Intersection of Legal Identity and Return, Readmission, and Reintegration. IOM and partners prioritized birth registration, consular services and digitized identity documents, with particular attention to women and children who face higher risks of exclusion. IOM facilitated information campaigns, mobile consulates, digital case management, skills training, microenterprise grants and mental health support.

49. Migrants in situations of vulnerability made up a sizeable share of those receiving return assistance in 2025 (13%). A total of 10,476 migrants in situations of vulnerability received support to return to their countries of origin, mainly Nigeria, Guinea, Mali and Bangladesh (listed by volume of returnees). IOM registered 167,788 migrants in situations of vulnerability and assisted 159,079 (a 31% decrease from 2024), of whom 13,638 were victims of trafficking, 9,485 were unaccompanied or separated children, and 25,609 had health-related needs.

50. Reintegration support is an essential component of IOM's approach to return migration, whether returns are facilitated by IOM or other stakeholders. This strengthens the sustainability of regular and safe migration governance. In 2025, IOM provided 201,327 reintegration services (a 23% increase from 2024) to returnees either before departure (0.2%) or after arrival (99.8%). IOM reintegration programmes demonstrate that sustainable reintegration is achieved through an integrated approach addressing economic, social and psychosocial dimensions at the individual, community and structural levels. Examples include market-aligned vocational training (Sierra Leone), livelihoods (Ethiopia), support for small businesses (Viet Nam), entrepreneurship (Georgia), and access to mental health and psychosocial support as a foundation for recovery (Ghana).

51. IOM facilitated the return of 81,785 people through assisted voluntary return and reintegration and other pathways. The top five countries of departure, in descending order, were Libya, the Niger, Algeria, Tunisia and the Kingdom of the Netherlands. The top five countries of destination, in descending order, were Nigeria, Guinea, Mali, Bangladesh and Chad.

52. IOM strengthened diaspora engagement to expand regular migration pathways, foster economic opportunities, support integration and engage diasporas as partners for solutions. Through the Global Diaspora Policy Alliance, IOM produced three policy papers and guidance notes on women and youth empowerment, health and well-being, and climate action. IOM conducted six capacity-building activities reaching 152 diaspora actors and trained 109 government officials on diaspora mapping and evidence-based engagement. Two publications developed with young academics and diaspora members presented case studies and actionable recommendations.

ENABLERS

53. In 2025, IOM deepened implementation of the Strategic Plan 2024–2028 through structural reforms, workforce investment, strengthened data and evidence systems, expanded partnerships and improved risk governance. The IOM Resilience Campaign was launched as a strategic appeal for all Member States to enhance IOM's resilience and sustainability amid rising global instability and shrinking flexible funding.

54. By the end of 2025, IOM's workforce (national and international staff) stood at 15,814, a decrease of nearly 30.5 per cent compared with the end of 2024. Women accounted for 49 per cent of the total workforce. Of the total, 1,292 women and 1,213 men belonged to the international Professional and higher category, and 6,452 women and 6,762 men belonged to the General Service and National Officer categories.

55. Under the People Strategy 2024–2028, IOM revamped its competitive recruitment, training and leadership processes to advance geographical diversity and gender equality in staffing at all levels. As a result, gender parity was reached at the P-5 grade, and maintained at the P-1, P-2, P-3, P-4 and D-1 grades. IOM recognizes that further action is needed to reach parity at the D-2 level.

56. In 2025, 6 per cent of positions were covered by core funds. The proportion of IOM staff working in field locations declined by 4 per cent compared to 2024, to 93 per cent. In the international Professional category, 17 per cent of staff operated in hardship locations (i.e. categories D and E), a slight decrease from 21 per cent in 2024.

57. IOM strengthened talent development and its leadership pipelines. The Leadership Programme trained over 200 leaders through 33 workshops, retreats, focus group discussions and 207 meetings. Capacity-building initiatives saw 64 staff complete the strategic thinking and management training (a 5% decrease from 2024) and 37 staff complete courses on leveraging global frameworks. Of the 242 staff working at the P-5, D-1 and D-2 levels, 47 per cent were women and 53 per cent men.

58. Safety protocols and mental health support were enhanced across IOM operations. Eighty-nine per cent of staff completed mandatory safety training (11% higher than 2024). Staff received mental health support through approximately 4,000 counselling sessions, 900 group sessions and 45 well-being missions to field locations.

59. IOM continued to strengthen partnerships across governments, multilateral institutions, civil society and the private sector to support coordinated approaches to migration. These partnerships were crucial to advancing crisis resilience, rights-based approaches, migrant protection and sustainable development.

60. In implementing its global activities, in 2025, IOM transferred USD 210.7 million to partners: USD 20.3 million to United Nations and related agencies; USD 7.9 million to intergovernmental organizations (non-United Nations); USD 60 million to international civil society organizations; USD 106

million to national civil society organizations; and USD 16.5 million to national government entities. These allocations were guided by principles of collective results, unity, risk awareness, coordination, independence, capacity-building and inclusivity.

Box 7. Engaging in the UN80 Initiative and other reforms

The year 2025 saw a range of United Nations-wide reforms with a sharp focus on efficiency. Under the UN80 Initiative, which aims to cut duplication, reduce overlapping mandates and streamline how United Nations agencies work together, IOM played an active role. In the Humanitarian Reset key results have included a reduction in the number of global humanitarian clusters and clarification of mandates.

Together, partners advanced efforts on shared data systems, joint supply chains and combined administrative functions, reducing costs and accelerating delivery. For instance, the Humanitarian Data Collaborative, in which IOM is involved, underscores the United Nations system-wide commitment to catalyse collective action on data to ensure efficiencies in delivery of humanitarian assistance and foresight planning. Through collaboration across the United Nations system, including global shared services, fleet and mobility mechanisms, an additional USD 11.3 million in efficiency gains was achieved.

61. IOM's engagement with the private sector grew significantly in 2025, securing over USD 50 million in commitments. Over 90 partnerships, including 36 new ones, supported operations in more than 40 countries and reached over one million people. The Organization also launched its Islamic Philanthropy Fund, expanding support for crisis-affected populations. IOM Goodwill Ambassadors and digital fundraising campaigns further advanced IOM's mission, broadening global engagement and solidarity for people on the move. Together, these efforts diversified the IOM funding base and enhanced delivery of results. For more information, read IOM's private sector [2025 Impact Report](#).

62. Global policy dialogue was advanced through the 2025 International Dialogue on Migration, which emphasized migration as a global asset for development and brought together over 1,500 participants. Discussions highlighted migration's contribution to economic growth, resilience and skills mobility, as well as narrowing regular pathways, and informed preparations for the [International Migration Review Forum 2026](#).

63. Regional collaboration was deepened through renewed and expanded partnerships. A new [Memorandum of Understanding with the African Development Bank Group](#) and an ongoing cooperation agreement with the [Development Bank of Latin America and the Caribbean](#) strengthened joint action on migration governance, diaspora engagement and responses to internal displacement. In Latin America and the Caribbean, the [Regional Refugee and Migrant Response Plan 2026](#) was launched, seeking USD 763 million to assist 1.2 million migrants and refugees with protection, integration and access to essential services. The Plan will be delivered by 152 partner organizations, which is fewer than in previous years as funding constraints have reshaped the operational landscape, affecting organizations across the region.

64. As Coordinator and Secretariat of the United Nations Network on Migration, IOM supported the regional reviews of the Global Compact in Asia and the Pacific, and Latin America and the Caribbean and now chairs or co-chairs 97 country-level United Nations networks on migration and 7 regional networks. Through the Network, IOM led the drafting of the Report of the United Nations Secretary-General on the Global Compact, which provides inputs to the International Migration Review Forum 2026. It also launched the Network's workplan and a road map for the International Migration Review Forum, which outlines the Network's support for Member States and stakeholders in preparation for the Forum.

65. By the end of 2025, the Capacity Building Mechanism of the Global Compact for Safe, Orderly and Regular Migration had supported 57 Member States to implement the Global Compact; 26 with short-term technical assistance, and 40 with joint programmes funded by the Migration Multi-Partner Trust Fund. Fifty-three United Nations country teams had received tailored training to strengthen support for Global Compact implementation, and the Fund mobilized contributions exceeding USD 68 million, with one of the United Nations development system's most diverse donor bases, engaging 17 United Nations entities.

66. IOM remains highly integrated within the United Nations development coordination systems, including as a core group member of the United Nations Sustainable Development Group. At the country level, 109 country offices signed United Nations Sustainable Development Cooperation Frameworks, 108 participated in or co-led related results groups and 120 provided input for UN-Info reporting.

67. At the [Second World Summit for Social Development in Doha](#), IOM showcased the contribution of human mobility to poverty eradication, full and productive employment and decent work for all, and social integration. At the [fourth International Conference on Financing for Development in Seville](#), IOM promoted investment in migration solutions including through expansion of the Migration Multi-Partner Trust Fund. At the [Third United Nations Conference on Landlocked Developing Countries \(LLDC3\)](#), IOM highlighted opportunities around diaspora and remittances, border management and regional integration, as well as around climate resilience and environmental mobility for the sustainable and resilient development of all landlocked developing countries.

68. IOM also continued to support the various regional consultative processes on migration in 2025 through technical secretariat coordination and by assisting Member States in the implementation of agreements and regional coordination efforts.

69. Privileges and immunities are vital to ensure IOM's ability to operate independently and effectively across its Member States, observer States and areas of activity. In 2025, IOM signed a new agreement with Haiti and received a letter from the Syrian Arab Republic committing to cooperate with IOM. By the end of 2025, IOM was granted privileges and immunities substantively similar to those to which the specialized agencies of the United Nations are entitled in accordance with the 1947 Convention on the Privileges and Immunities of the Specialized Agencies in 111 States and places (up from 108 in 2024).

70. During 2025, IOM continued to pursue a more sustainable funding model, seeking flexible, multi-year and diversified financing to support integrated programming. Through the Resilience Campaign, the Organization worked to enhance organizational resilience and sustainability amid rising global instability and shrinking flexible funding.

71. The [IOM Global Appeal for 2025](#) set out USD 8.2 billion in required funding to support 101 million people in line with the Strategic Plan 2024–2028. The Global Appeal informed Member States, donors and the wider community of the funding required for IOM to address the most urgent needs of migrants in situations of vulnerability and to support migration governance. IOM convened five Donor Advisory Group meetings to consult on the Global Appeal, ensure accountability to donors and strengthen donor engagement.

72. IOM also strengthened engagement with Member States providing flexible funding in the form of unearmarked and softly earmarked contributions totaling USD 125.3 million in flexible funding, including contributions from Member States, non-Member States and from the private sector. The largest contributors of this valuable flexible funding in descending order were the United States of

America, Denmark, the United Kingdom, the Kingdom of the Netherlands, Sweden, Norway, Germany, France, Canada and Qatar.

73. During 2025, a total of USD 49.4 million in voluntary unearmarked contributions, including to the Resilience Fund, were received from 23 donors, including individual giving and donors who opted to not be disclosed.

Box 8. Diversified and sustainable funding

As humanitarian and development funding tightened in 2025, IOM worked to diversify its income and secure more predictable and flexible resources. Currently, only 4 per cent of IOM income (or 5% of voluntary contributions to IOM) is flexible; the rest is earmarked to specific projects. This leaves the Organization vulnerable when priorities shift or emergencies arise. To address this, IOM expanded its funding base through several initiatives. The IOM Resilience Campaign, launched in June 2025, sought flexible funding to enhance organizational resilience and sustainability. These capacities are the backbone of worldwide field operations, powering crisis response, technical expertise, compliance and leadership in fragile and high-risk environments. By December 2025, 20 countries, one federal state and two private sector entities had pledged support.

The [Islamic Philanthropy Fund](#), launched in February 2025, provides a structured mechanism for donors to contribute zakat and sadaqah in alignment with sharia principles, supporting protection, emergency assistance and community resilience. In its first year, the Fund focused on responding to the crisis in the Sudan, including by launching a global Ramadan digital campaign to highlight IOM's work. The initial emphasis was on countries affected by crises, including those that are Member States of the Organization of Islamic Cooperation. IOM also broadened private sector partnerships and expanded individual giving through global campaigns and digital platforms.

74. The total combined revenue of the Organization, comprising assessed contributions, voluntary contributions and other income, decreased by 24 per cent compared with 2024 to USD 2.84 billion in 2025. Assessed contributions from Member States continued to represent a small proportion of IOM's funding structure, accounting for 3.5 per cent of consolidated revenue for 2025. The statement of financial performance for 2025 showed a 19.4 per cent decrease in the total combined expenditure compared with 2024, with total expenses of USD 2.95 billion.

75. IOM continued to improve the quality, management and use of its data to inform decisions, strengthen accountability and support timely operational responses, consistent with commitments set out in the Strategic Plan 2024–2028.

76. In 2025, IOM published a [Compendium of IOM Innovative Data Initiatives to Drive Transformative Development Financing](#), documenting 23 data initiatives across Africa, Asia and the Pacific, Latin America and the Caribbean, Europe and the Middle East. These initiatives demonstrate IOM's use of high-quality, forward-looking analysis and scenario planning to inform migration policy and programming, including climate mobility, resilience and displacement solutions.

77. In 2025, IOM advanced solutions analysis through the third [Periodic Global Report on the State of Solutions to Internal Displacement](#) (PROGRESS 2025), with DTM evidence highlighting local integration as a key pathway, as many long-term displaced persons remain where they reside. The report was downloaded 364 times by the end of 2025. In parallel, reflecting IOM's emphasis on data-based programming, the Organization co-led the Data for Solutions to Internal Displacement (DSID) Initiative, contributing recommendations to the Expert Group on Refugee, IDP and Statelessness Statistics (EGRIS) to strengthen the coherence and practical use of solutions data.

78. The use of IOM's data and analysis in key United Nations development programming documents increased significantly in 2025. Displacement and mobility analyses, as well as data on crisis contexts, were used in 94 common country analyses. Migration was mainstreamed into common country analyses in 108 countries and integrated into United Nations Sustainable Development Cooperation Frameworks in 105 countries.

Box 9. Digital skills and artificial intelligence

In 2025, IOM launched an Organization-wide artificial intelligence upskilling programme to train staff in data analytics capabilities, the responsible use of artificial intelligence, predictive tools and digital applications for migration management. Over 5,000 staff completed the courses. Digital hubs piloted advanced applications for case management and forecasting. The skills and tools developed through these programmes were integrated into the new IOM enterprise resource planning system, WAVE, to support data-driven operations across field missions and Headquarters.

The Organization also developed artificial intelligence-powered solutions to support drafting project proposals, which helped to streamline and standardize a process that previously varied widely across IOM. Early results show faster proposal drafting, more consistent quality and reduced workload for programme teams. All initiatives followed global standards and the IOM ethics framework for responsible technology use.

79. In 2025, the [World Migration Report 2024](#) website views reached 954,564 and the report was mentioned in more than 230 media articles and cited in 1,180 research publications. DTM reports, data sets and maps from the DTM and Humanitarian Data Exchange websites were downloaded more than 2.2 million times.

80. IOM strengthened global access to high-quality migration evidence by expanding its [Publications Platform](#) with an additional 144 publications, bringing the total to 3,491 publications in 51 languages. Available in IOM's official languages, with some publications available in other languages, the platform remains a leading open-access resource featuring insights from IOM's global operations.

81. In July 2025, IOM established a Data Protection Office to safeguard personal data and uphold privacy standards. The percentage of staff who had completed the mandatory data protection training, which has been a requirement for all IOM staff since 2021, reached over 85 per cent by the end of 2025.

82. IOM continued to systematically capture lessons learned to strengthen evidence-informed approaches across its operations through 277 learning initiatives. The [Peer Exchange and Learning on Migration \(POEM\)](#) platform hosts over 650 quality-reviewed knowledge resources and innovations. The [IOM Knowledge Management Impact Report 2024–2025](#) further highlighted progress in translating the Knowledge Management Strategy 2024–2028 into practice and the growing contribution of knowledge systems to operational impact.

83. Through its INCKED@IOM innovation and knowledge capacity-development initiative, IOM reinforced systems thinking and innovation competencies. More than 300 participants engaged in activities in Germany, Iraq, the Philippines and Tunisia. During 2025, 157 innovative actions were developed and implemented in IOM operations. IOM mobilized more than USD 3 million under the [Innovation Norway Humanitarian Innovation Programme](#), supporting four projects to pilot and scale new solutions.

84. In the Middle East and North Africa, IOM launched a multilingual climate mobility platform giving policymakers centralized access to data, policies and programming on climate-related movement. In Europe and Central Asia, IOM published 11 regional reports on Mediterranean migration trends through the DTM website, including two with UNHCR and the United Nations Children's Fund (UNICEF) on children's movement to Europe. The Migrant Protection Platform, serving users from over 180 countries, earned a Mercury Excellence Award honouring excellence in public relations and was featured at the UN 2.0 Week Data and Digital Expo.

85. Through the IOM Development Fund, more than USD 15 million was allocated to 57 projects across 61 eligible Member States, prioritizing: labour migration; environment and climate change; transfer of migrant knowledge and resources; and protection and assistance to migrants in situations of vulnerability.

86. In 2025, the number of IOM staff who actively pursued learning across all learning platforms reached 13,880 (87.8% of all staff). Staff in the General Service and National Officer categories, as well as in the international Professional category remained highly engaged in capacity-building activities at 86 per cent and 80 per cent, respectively. Field participation remained high, as 96.3 per cent of all actively engaged learners are based in field locations, enhancing IOM's ability to deliver principled and effective migration governance interventions.

87. IOM expanded its global reach and strengthened its role as a trusted source of information on migration. The IOM web ecosystem grew by 380 per cent, generating more than 6 million views, while the number of users increased by 30 per cent, bringing more than 3.1 million additional users to IOM digital platforms. Social media audiences also continued to grow, reaching 4.3 million followers across platforms and surpassing 1.2 million followers on LinkedIn, which is a key channel for engaging policymakers and partners. Nearly 3,000 social media posts generated 26 million impressions. Global media coverage reached 74,000 mentions.

88. With the launch of the [Why IOM Matters](#) campaign, IOM highlighted the human impact of migration and the work of its staff and partners worldwide. Within its first six months, the campaign produced 53 first-person stories from across regions, amplifying voices from the field and strengthening people-centred narratives. IOM's digital leadership also continued to gain recognition, with IOM's [digital Annual Report 2024](#) receiving an industry award for the second consecutive year.

89. IOM strengthened its crisis response and risk governance approach amid escalating global crises, while giving priority to high-risk emergency operations. Eighty-nine country offices updated risk registers in 2025, improving oversight and operational resilience and ensuring the mainstreaming of risk management. IOM focused on larger and more complex operations while building capacities across all operations, and maintained transparent communication with Member States.

90. IOM further implemented the United Nations business operations strategy, achieving approximately USD 4.5 million in projected efficiency gains in 2025 and co-locating 35 per cent of IOM premises in common United Nations premises. Leveraging global shared services and United Nations common back offices in four locations, the Organization optimized resource use while enhancing service quality and inter-agency collaboration.

91. Through the Project Information and Management Application (PRIMA), IOM activated over 748 projects with a budget of USD 2.38 billion, strengthening alignment with the Strategic Results Framework. Integration between PRIMA and the newly launched enterprise resource planning system improved results-based management, ensuring impactful, well-monitored initiatives for migrants and communities.

92. In 2025, the Office of Legal Affairs handled a total of 4,822 agreements and contracts, of which 764 were funding agreements.

Box 10. Strengthening operational efficiency

In 2025, IOM recorded total efficiency gains of USD 43.3 million, representing a USD 9.6 million (28%) increase compared to 2024. IOM has achieved significant efficiency gains in the form of cost savings, cost avoidance, time savings and enhanced quality through business process automation and digitalization, serverless technology and connectivity programmes, expanded global long-term agreements with vendors, and strengthened inter-agency collaboration and global shared services with United Nations partners. This work is aligned with the UN80 Initiative, and High-Level Committee on Management and Business Innovations Group priorities. These efforts have also strengthened compliance frameworks, advanced environmental sustainability, increased organizational agility in complex and rapidly evolving operational contexts, and freed up resources for programmes and front-line assistance.

Supply chain improvements were central to these efficiency gains. Key actions included the global pre-positioning of USD 21 million in relief supplies and the digitization of procurement and dispatch processes, which accelerated delivery timelines, enhanced rapid and safe large-scale assistance, and reduced risks of fraud and waste. These efforts were reinforced by continued investment in staff and partner capacity. Notably, the [Thessaloniki humanitarian hub](#), established with the Government of Greece, now enables faster deployment of life-saving aid across Europe and beyond.

93. IOM advanced its digital transformation, investing in cloud-based infrastructure to improve agility, security and global connectivity (99% of offices were compliant by 2025). This resulted in efficiency gains that amplified IOM's capacity to deliver innovative, migrant-centred solutions by ensuring that technology catalyses operational excellence and sustainable impact.

94. In 2025, IOM strengthened its security risk management framework to provide structured, evidence-based advisory support to security decision-makers on acceptable risk decision-making, enabling the safeguarding of personnel assets and operations while enabling programme delivery. Security compliance performance improved, with 94.9 per cent of offices completing the Security Compliance Survey and 340 offices (88.7% of IOM's total offices) achieving a compliance rating of 70 per cent or higher, representing a 4.5 percentage point increase and resulting in an overall global average compliance rate of 88.7 per cent. Organizational security risk management and preparedness were further reinforced through training, with Safe and Secure Approach in Field Environments (SSAFE) training compliance reaching 89 per cent, exceeding the baseline target of 70 per cent and strengthening informed risk acceptance across operations.

95. Aligning with IOM's strategic priorities and following an "informal first" approach, IOM's Office of the Ombudsperson and Mediation Services addressed 546 workplace matters in 2025 (a 39% increase from 2024), of which 64.5 per cent were resolved. Conflict management and outreach activities engaged over 1,100 personnel globally, with the additional capacity-building of 79 respectful workplace focal points. The Office's online resources and outreach initiatives continued to support staff well-being and systemic equity. The Office also contributed to global leadership and remained engaged in system-wide collaboration through the [Network of Ombuds and Mediators of Multilateral Organizations](#) (formerly UNARIO) and the activities of the Network of United Nations System Ombudsman and Mediators in organizations that are members of the United Nations System [Chief Executives Board for Coordination](#) in conflict trend analyses, sharing best practices and improving joint early-warning inputs across United Nations entities.

CROSS-CUTTING PRIORITIES

96. In 2025, IOM renewed its commitment to fostering a culture of integrity across its workforce and operations. The independent Office of Ethics and Prevention of Sexual Exploitation and Abuse and Sexual Harassment presented its first Annual Report directly to Member States in June 2025. A new staffing strategy introduced the first Ethics Officer positions in the field, enabling more targeted ethics guidance and outreach in different regions. Compliance with mandatory online ethics training rose to 91.2 per cent of staff. Over 4,200 personnel received live ethics training across an expanded range of topics, while over 800 personnel joined interactive fraud awareness training sessions.

97. Requests for ethics advice remained high (2,225 queries, excluding disclosures assessed as part of yearly declaration of interests exercise, down 20% from 2024) and continued to be handled promptly, with an average first response time of 1.8 days. The increased number of retaliation concerns submitted to the ethics unit was also handled promptly, with 36 formal complaints received (up 89% from 2024) and over 94 per cent of preliminary assessments completed within 30 days. IOM further expanded its yearly declaration of interests exercise, mitigating risk of conflicts of interest for 2,046 individuals (up 105% from 2024) in senior positions, financial management roles and independent offices.

98. IOM enhanced internal oversight to strengthen transparency and accountability. In 2025, the Office of Internal Oversight received 1,396 submissions, compared to 1,772 in 2024. The Office of Internal Oversight transmitted 141 cases to the Office of Legal Affairs, closed 1,044 cases and referred 1,077 cases for further action. To manage increasing caseloads, the Office continued a restructuring and decentralization effort to sustain investigative capacity and accountability.

99. Internal oversight and financial accountability were further strengthened through increased audit coverage. The internal audit function completed all 19 audit engagements planned in the revised 2025 workplan. This included 3 policy, processes and programmes (3P) audits, and audits for 16 country offices.

100. IOM's independent evaluation function enhanced transparency, accountability and evidence-based decision-making. A total of 74 evaluations were completed, including 67 decentralized evaluations, 5 centralized evaluations, 1 joint evaluation and 1 independent system-wide evaluation, providing critical insights into migration policies, humanitarian responses and programme effectiveness.

101. To ensure alignment with the Strategic Plan 2024–2028 and the Strategic Results Framework, IOM continued to improve its results-based management approach in 2025. IOM expanded access to standardized strategic planning and results-based management training by adding the Integrated Strategic Planning and Results Course to the WAVE e-learning platform. A four-part country strategy development webinar series was held, attracting over 490 participants. This has contributed to the continued uptake of results-oriented country strategies, strengthening evidence-based programming and accountability.

102. The Organization's continued focus on transparency was further exemplified by its consistent performance on the International Aid Transparency Initiative dashboard in 2025. IOM retained a strong score of 91, ranking fifth after UNICEF, the World Food Programme, the United Nations Central Emergency Response Fund and UNHCR. This consistency reflects IOM's leadership in global transparency efforts and in enhancing transparency across development and humanitarian sectors, including its commitment to localization.

103. IOM enhanced strategic reporting, fostering transparent discussions about achievements, challenges and areas for improvement with Member States and key partners. Beyond statutory governing body meetings, IOM engaged with Member States through the International Dialogue on Migration and some 15 informal global and regional briefings on topics such as regional strategies as well as programmatic and organizational matters.

104. IOM met 3 out of 18 performance indicators of the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women. IOM also met or exceeded 31.25 per cent of its performance indicators under the United Nations Disability Inclusion Strategy.

105. During the year, 39 IOM projects reported having dedicated resources for improving accessibility and inclusion for persons with disabilities, and 39 projects reported having targeted outcomes, outputs and activities to support the uptake of services by persons with disabilities. Furthermore, in 2025, 15 IOM country offices had one or more dedicated staff members for programmatic work related to disability inclusion.

106. In 2025, IOM advanced youth engagement in migration governance through 298 projects and ensured youth participation in a further 218 projects. For instance, IOM [strengthened youth leadership](#) in Africa by selecting 40 young climate mobility changemakers and launched the COMPASS-funded [WakaWell Youth Hackathon](#), which brought together innovators to create digital tools for safe and informed migration.

107. During the year, IOM continued advancing diverse geographical representation in its workforce, with 176 nationalities (92%) represented across all staff, 151 nationalities (80%) at the international Professional level, and 80 nationalities (41%) at senior levels (P5, D1 and D2). To strengthen representation, IOM conducted targeted outreach, including two online careers fairs. These efforts, alongside targeted communication and constant data monitoring for informed decision-making, contributed to ensuring larger pools of qualified candidates and maintaining good representation of Member States among international Professional staff. Due to the structural realignment, the percentage of represented Member States decreased from 85 per cent in 2024 to 82 per cent in 2025.

108. In 2025, IOM mainstreamed protection – including sexual violence risk mitigation and child protection – across all sectors of intervention, ensuring that responses promoted a “do no harm” approach, meaningful access, accountability, empowerment and the safe participation of at-risk individuals at all stages of programming. IOM also revised its protection mainstreaming guidance to ensure its application extends beyond crisis settings and reinforces an Organization-wide commitment to the safety, dignity and rights of migrants.

109. IOM is committed to placing the human rights, safety and dignity of affected populations at the core of its operations. In 2025, protection from sexual exploitation, sexual abuse and sexual harassment was integrated into the country strategies and risk assessments of 64 IOM country offices.

110. IOM made considerable strides in advancing its victim-centred approach by launching a support package for ensuring access to assistance for victims/survivors of sexual exploitation and abuse and sexual harassment, which equips protection from sexual exploitation and abuse and sexual harassment personnel with clear guidance and easy-to-use tools to ensure victims/survivors can access timely, end-to-end survivor-centred assistance in line with minimum standards. In 2025, during phase I of the roll-out of the package, IOM trained 53 full-time Protection from Sexual Exploitation and Abuse and Sexual Harassment Officers across all six regions.

111. In 2025, IOM issued a Staff Advisory on its Child Safeguarding Policy and established an interdepartmental task team to lead the implementation of the policy. Through 12 global sessions covering all IOM regions, IOM raised awareness among 3,572 personnel worldwide, including staff, consultants, interns and United Nations Volunteers, on the policy, applicable standards of conduct and duties and obligations with respect to child safeguarding.

112. IOM retained its protection from sexual exploitation, sexual abuse and sexual harassment capacity at the field level, with 74 full-time Protection from Sexual Exploitation and Abuse and Sexual Harassment Officers covering 64 countries and four of IOM's six regional offices in 2025. More than 200 focal points on protection from sexual exploitation, sexual abuse and sexual harassment are present in 153 country offices. IOM is an active contributor to inter-agency protection from sexual exploitation and abuse networks and task forces at the country level. In addition, 68 IOM country offices have signed inter-agency sexual exploitation and abuse complaint referral standard operating procedures, strengthening institutional capacity to address this issue.

113. In 2025, a total of 22,435 IOM personnel completed the mandatory IOM prevention of sexual exploitation, sexual abuse and sexual harassment training, by participating in one of over 239 facilitator-led sessions or by completing the online self-paced training course.

114. Over the course of the year, IOM continued to mainstream the principles of accountability to affected populations across its crisis and non-crisis programming. Focal points participating in inter-agency coordination on accountability to affected populations were present in 71 IOM offices engaged in crisis and non-crisis responses, with 10 country offices co-leading inter-agency working groups. Furthermore, accountability to affected populations was integrated into 933 IOM projects across 127 countries.

115. IOM actively promotes environmental sustainability across its operations in line with United Nations system-wide commitments. IOM's environmental performance is reported through the United Nations Greening the Blue process, which documents, inter alia, environmental governance, greenhouse gas emissions, water use and waste generation. The [2024 report](#), issued in late 2025, highlighted IOM's environmental performance and its continuous improvement including through the completion of its largest solarization project to date, with 2,000 solar panels and an overall capacity of 1,250 kWp installed across all IOM-managed humanitarian hubs in [Nigeria](#). Following its model approach to decarbonization that also brings access to clean energy to nearby communities using peace renewable energy credits and private sector resources, [IOM partnered with YG Entertainment to install a renewable energy system at a university in Bor, South Sudan](#).

Annex I:
Statistics relating to IOM staff¹
(including senior leadership)

Table 1. Number of men and women in the Professional and higher categories (2021–2025)

	2021	2022	2023	2024	2025
Men	1 195	1 292	1 502	1 611	1213
Women	1 164	1 282	1 492	1 687	1292
